I love to learn, but more than that I love to apply what I have learned into practice. I know that nobody is perfect so the focus of my work is more on completing tasks rather than on the pursuit of perfection. Then I can focus on improvements and finding more effective solution. I take full responsibility for the actions and decisions which I take for my decisions and actions are always based on careful and informed choice among several options. I strive to be stable and reliable member of my team and to enable people around me to grow and develop their skills in a friendly and supportive environment. I am not afraid of changes and I face new opportunities with an open mind constantly looking for improvements of my work.

Technical Skills

Likes: linux, python, ansible, zabbix, ssh, openssh, git, sftp, gnupg, suse

Dislikes: ruby, php, web

Projects & Interests

GitHub - zabbix – <https://github.com/yradunchev/zabbix>

December 2015 - January 2016

Zabbix stuff

GitHub - ansibles – <https://github.com/yradunchev/ansibles>

January 2016

ansible stuff

GitHub - psstbl – <https://github.com/yradunchev/psstbl>

October 2012 - January 2014

Password Table Generator

Design and implementation.

Writing

ansible: upgrade vmware tools on sles [linux] – <http://blog.radunchev.com/2016/01/26/ansible-upgrade-vmware-tools-on-sles-linux/>

A playbook to install/upgrade VMware Tools on SLES servers.

'extend' ad user expired password [windows] – <http://blog.radunchev.com/2016/02/04/extend-ad-user-expired-password-windows/>

'Extend' AD user expired password. Do not do it unless you have a really, really good reason!

ssh-rdp management [linux] – <http://blog.radunchev.com/2016/03/11/ssh-rdp-management-linux/>

Manage rdp sessions over ssh tunnels from command line.
